Progress MOVEit Client

An Easy-to-Use Windows or Mac Client for End-User Transfer with Progress MOVEit

DATA SHEET

MOVEit® CLIENT BENEFITS
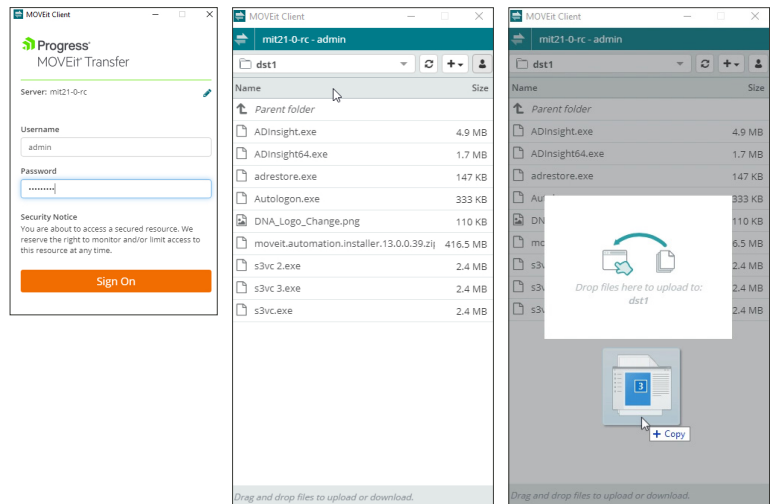

✓ **Simple drag-and-drop secure transfers**

✓ **Zero training required for users to upload or download**

✓ **All the security and encryption features of MOVEit**

✓ **Free download for Windows and Mac desktops**

✓ **Supports Single Sign-On (SSO)**

✓ **Supports Multi-Factor Authentication (MFA)**

Faster Onboarding for End Users

Progress® MOVEit® Client has a simple interface that allows internal and external MOVEit users to easily upload, download and drag and drop files from secure folders. There's no training required and MOVEit Client is available for free from within the Progress® MOVEit® Transfer interface or from the Progress website.

Secure File Transfers with Broad Visibility

Built using the MOVEit REST API, MOVEit Client includes robust security, encryption and auditing capabilities. With native support for Windows and MacOS platforms, users can easily interact with MOVEit files and folders from their own desktops. MOVEit users who have been granted sharing permissions can easily customize user access for upload/download permissions and file and folder visibility.
