

MOVEit® Client

An Easy-to-Use, Windows or Mac Client for End-User Transfer with MOVEit

DATA SHEET

KEY BENEFITS

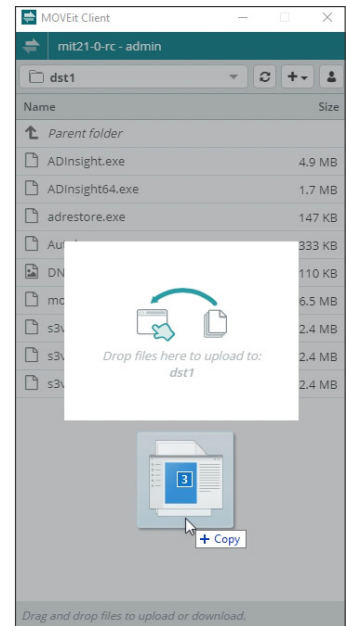

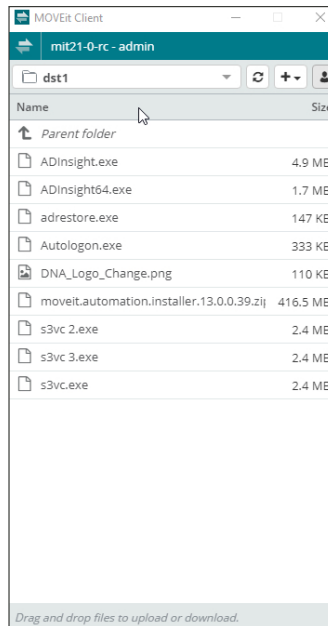

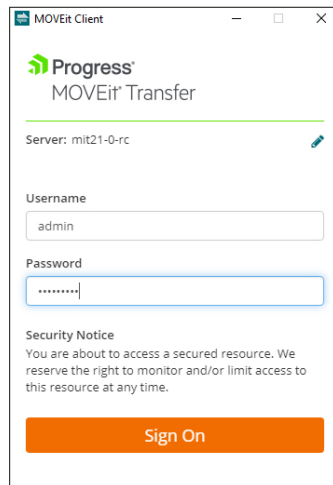

- ✓ Simple drag & drop secure transfers
- ✓ Zero training required for users to upload or download
- ✓ All the security and encryption features of MOVEit
- ✓ Free download for Windows and Mac desktops
- ✓ Supports Single Sign-On (SSO)
- ✓ Supports Multi-Factor Authentication (MFA)

Faster Onboarding for End Users

The MOVEit Client has a simple interface that allows internal and external MOVEit users to upload and download files from secure folders as easily as dragging and dropping. There's no training required and the MOVEit Client is available for free from within the MOVEit Transfer interface or from [ipswitch.com](https://www.ipswitch.com).

Secure File Transfers with Complete Visibility

Built using the MOVEit REST API, the MOVEit Client includes all the security, encryption and auditing capabilities of MOVEit. With native support for Windows and MacOS platforms, users can easily interact with MOVEit files and folders from their own desktop. MOVEit users that have been granted sharing permissions can easily customize user access for upload/download permissions and file and folder visibility.
