

MOVEit® Cloud

Managed File Transfer-as-a-Service

DATA SHEET

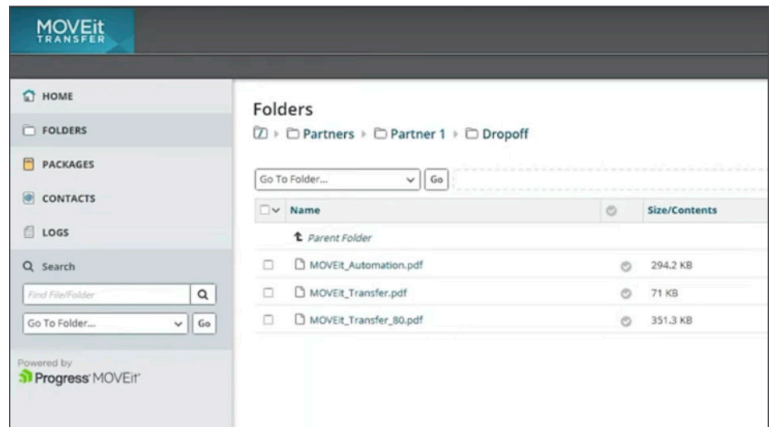

KEY BENEFITS

- ✓ **Eliminate time spent managing software and security updates**
- ✓ **Integrate with in-house applications and services**
- ✓ **Reduce the risk of data loss and non-compliance**
- ✓ **Centralize file transfer management and visibility**
- ✓ **Transfer sensitive information more securely**
- ✓ **Aid secure end user collaboration**

Progress® MOVEit® Cloud is Managed File Transfer as a service in the Azure Cloud. It enables the consolidation of all file transfer activities into one system allowing for broad visibility and management control over file transfers that are critical to your organization. It provides the security, centralized access controls, file encryption and activity tracking needed to achieve operational reliability and compliance with SLAs, internal governance and regulatory requirements. MOVEit Cloud is an auditor-certified HIPAA, HITECH and HIPAA Omnibus-compliant solution that is GDPR-ready to help you meet industry regulations. Combined with the MOVEit PCI DSS 3.2.1, SOC2 Type 2 and ISO 27001 certified feature set, MOVEit Cloud is built to help you protect sensitive data as part of your file transfer process.

MOVEit Cloud: Managed File Transfer Just Got Better

MOVEit Cloud delivers on both business user and IT requirements while offering compliant file transfer as a managed service to stay on top of industry requirements and statutes. Employees can easily share files and messages with other people and groups, while IT professionals can confidently administer the exchange of files between systems and people. MOVEit Cloud takes care of the day-to-day operational compliance of a managed file transfer solution. Not only does MOVEit Cloud provide flexibility, predictability and scalability—it helps you achieve the results that matter most: increased employee productivity, a guaranteed service level (SLA) and reduced data risk by enhancing visibility, control and security. MOVEit Cloud drastically reduces the scope of compliance audits with the expert-managed, common security framework of Progress®.

Secure File Transfers with Complete Visibility

In an era of high-visibility security violations, MOVEit Cloud protects your most valuable asset—your data—by incorporating essential security measures for cloud services, such as:

- Broad encryption, including storage encryption (“data-at-rest”)
- Non-repudiation
- Intrusion detection and vulnerability scans
- Control over user access and permissions
- Centralized user authentication
- Single sign-on via SAML 2.0 integration to IdP systems
- Separation of administrator duties
- Audit trails of all activities
- Separate encryption keys for each customer and each file
- User authorization for access to contents and files

GDPR-READY

Organizations that process personal data of EU residents can leverage MOVEit Cloud to uphold compliance with GDPR.

HIPAA COMPLIANCE

MOVEit Cloud is auditor-certified for compliance with HIPAA (Health Insurance Portability and Accountability Act).

PCI 3.2.1-CERTIFIED

Companies that store, process or transmit sensitive cardholder data can incorporate the Progress PCI Report on Compliance (RoC) for the MOVEit Cloud service in their third-party compliance assessments.

SOC 2 TYPE 2

MOVEit Cloud has obtained the SOC 2 designation from a third-party auditor as evidence of sound management and security controls.

PROFESSIONALLY MANAGED BY EXPERTS

Eliminate the time spent on system management and time-consuming migrations.

ROBUST SECURITY

Stay current on the latest security updates and layers of defense, including access control, integrity checking, PEN testing and more. Single sign-on capability via SAML 2.0 integration is available to Identity Provider systems.

RELIABILITY, ELASTICITY AND RAPID DEPLOYMENT

Quickly satisfy peaks in demand with rapid deployment and increased elasticity with managed multi-node scaling.

TRUSTED BY THE MOST DATA-SENSITIVE INDUSTRIES

MOVEit Cloud is delivered by Progress, an industry-leader in the file transfer space for decades. Customers from healthcare, finance and other data-sensitive industries rely on the proven expertise and 24/7 support from Progress.

DATACENTER AND MANAGED OPERATIONS

- SSAE 16 SOC 2 Type 2 report available
- EU-US Safe Harbor-certified
- EU-hosted datacenters for EU-based customers
- Software upgrades managed by Progress Cloud Operations team
- 24x7x365 active monitoring of the system with automated alerts

SECURE SYSTEM ARCHITECTURE

- Professional-grade security controls, multiple layers of defenses and FIPS-validated cryptography enable compliance with requirements and IT policy
- Hosting staff has no access to the contents of your files
- Multi-tenant software with separate encryption keys for each customer and each file
- Intrusion detection and regular vulnerability scans
- Local high availability provided by load-balanced webfarms

OFFSITE BACKUP AND DISASTER RECOVERY

- Continuous replication from primary datacenters to geographically distinct failover datacenters
- Your configuration is backed up every night
- Easily accessible offsite data backup wherever you choose

REPORTING, LOGGING AND RETENTION

- Usage reports on bandwidth and storage
- Billback support tracks usage consumed by user group so you can allocate costs internally
- 30 days of default online audit log retention—system setting log archives are available
- Expired audit logs may be automatically archived on the system or downloaded in CSV or XML format

AVAILABLE ON DEMAND

- Free limited-time evaluation with technical support available
- New subscriptions and upgrades are provisioned in hours
- System resources are elastic, with more capacity for users, files or bandwidth instantly provisioned to customers
- Security and compliance questions are handled by our expert team
