Progress Services
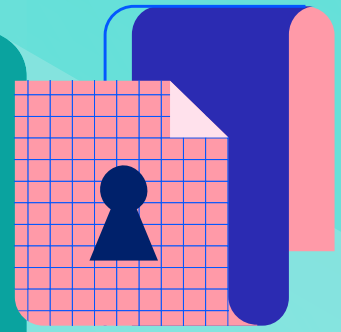

MOVEit Gateway Implementation Services

OVERVIEW

Our commitment to you extends beyond the initial purchase of our products. Following your purchase, our team of Progress Professional Services Technical Consultants is dedicated to ensuring a prompt, efficient, and successful deployment of our software.

Our MOVEit Gateway offers a DMZ proxy feature designed to facilitate MOVEit Transfer deployments within secure networks, ensuring compliance with stringent data protection regulations such as GDPR, HIPAA, and PCI-DSS.

Progress Professional Services offers customized MOVEit Gateway Implementation Services tailored to your business requirements. Our primary implementation service encompasses the following key components:

- **Deployment of a singular MOVEit Gateway Server**
- **Configuration of a singular MOVEit Gateway to- MOVEit Transfer connection**

Our Implementation Service allows your system administrators or support personnel to collaborate with our Technical Consultants for up to three hours, covering installation and post-implementation support. This collaboration includes:

Implementation Services

Project Planning

- Strategy discussions for implementation
- Verification of prerequisites
- Activity scheduling
- Implementation

Installation of the MOVEit Gateway server software

- Configuration of the MOVEit Gateway settings on the server
- Establishment of secure connections between MOVEit Gateway and MOVEit Transfer
- Customization of proxies with certificates, ports, or keys.
