

# MOVEit Transfer Implementation Services

OVERVIEW

Our commitment to you extends beyond the initial purchase of our products. Following your purchase, our team of Progress Professional Services Technical Consultants is dedicated to ensuring a prompt, efficient, and successful deployment of our software.

Our MOVEit Transfer software stands as a trusted solution utilized by numerous global organizations, offering comprehensive oversight and command over file transfer operations. It ensures the dependability of core business processes and facilitates the secure and compliant exchange of sensitive data among partners, customers, users, and systems.

Progress Professional Services presents tailored MOVEit Transfer implementation and configuration solutions. Following the completion of fundamental Implementation Service tasks, customers gain the flexibility to allocate remaining time towards a selection of optional services.

## Core Activities and Post-Implementation Options for MOVEit Transfer

### Installation of the MOVEit Transfer software

- Initial configuration of the licensed organization
- Review of backup procedures
- Guided walkthrough of MOVEit Transfer configuration utility
- Web-farm Implementation Service (up to 5 hours of service)

### Recommended for high availability

- Preliminary planning sessions
- Installation and foundational configuration of multiple MOVEit Transfer Web farm nodes
- Review of patching procedures
- Customization post-implementation (subject to available time after planning and Web farm configuration)
