

# Progress MOVEit API

Unlock extended functionality to take control of your MFT workflows

DATA SHEET

In today's highly interconnected corporate world, IT teams need flexible options to securely exchange sensitive data to power business workflows. Manual scripting and human intervention are prone to errors, limit visibility and erode operational efficiency. For enterprises importing and exporting data with third parties, Progress® MOVEit® helps you develop, integrate and deploy secure file transfer processes. For added flexibility to meet your complex needs, the MOVEit API provides customization to fine-tune file transfer workflows and integrate them with your favorite business applications.

## Features

Gain programmatic access through multiple scripting languages and command line HTTP clients, including PowerShell, Python, Perl and Curl

- Leverage a variety of client libraries, including REST API, Java, .NET and Windows API
- Visualize calls with Swagger web UI
- Run integrity checks for file transfers
- Aid file delivery with automatic transfer retry and resumption
- Enable management of SSH keys and SSL certificates in Progress® MOVEit® Transfer
