

Build.One Slashes Dev Time, Simplifies Rules Complexity with Progress Corticon.js

AT A GLANCE

BUILD.ONE

When international low-code/no-code leader, Build.One, wanted to accelerate time to market while elevating web UI logic, Progress® Corticon.js® was the best, and only, solution.

COMPANY

Build.One (Formerly AKIOMA Software)

INDUSTRY

Software

PRODUCT

Progress Corticon.js

COUNTRY

Germany

Challenge

Complex rules requirements were outpacing web browsers' ability to keep pace, leading to UI command delays and manual web UI coding.

“To achieve this level of automation and low-code/no-code possibilities would simply not have been possible for us without Corticon.js.”

Mike Liewehr

Founder and CEO, Build.One

Solution

Integrated directly into the Build.One.SWAT! framework

Accelerated performance of browser-based UI logic

Enhanced no-code web UI capabilities

Results

90% Cut in web UI development time

98% Faster command response time—down to 10 milliseconds

Reduced need for ongoing developer oversight

Bring the speed and power of Progress Corticon.js to your web UI project
