Build the Business Applications of Tomorrow, Today

Discover the advantages of working with Progress technologies.

**BETTER APPLICATION EXPERIENCES**

- **3X** increase in user engagement

**FASTER CYCLES OF INNOVATION**

- **40%** reduction in time-to-market for business-critical apps

**LOWER COST**

- **60%** decrease in app dev and deployment costs

Progress offers the best platform for building and deploying tomorrow’s applications quickly and easily. Progress offers flexible **frontend** tooling for delivering an engaging and multi-channel UX, a modern, reliable, scalable and secure serverless cloud **backend** to build and run microservices, and leading **data connectivity** capabilities for harnessing data from business systems and any other data source, whether on premise or in the cloud.

Progress customers span the globe and include thousands of ISVs that build their business application offerings on Progress, and tens of thousands of organizations using Progress to build their own mission-critical applications.
Progress provides the best platform for deploying tomorrow’s applications quickly and easily by helping you deliver engaging user experiences without limits across existing and emerging user channels. Your apps will lead with intelligence, enabled by predictive results generated by automated machine learning. These intelligence services are part of a modern cloud that also includes robust backend services, business rules and content as a service. And you can easily harness big data by connecting to all data and business systems on premise or in the cloud.
Adaptive Experiences

Responsive Web

Build compelling experiences with the industry's most complete UI toolbox; create data-rich desktop, tablet and mobile web apps, while speeding HTML and JavaScript development

www.progress.com/kendo-ui

Modern UI

Build modern UI for web, desktop and mobile apps with our .NET, JavaScript, reporting and productivity tools

www.progress.com/telerik

Native Apps

Get native performance and UX for iOS and Android from a single code base; leverage popular web skills—JavaScript, Angular and CSS—and it's free and open source

www.nativescript.org

Chatbot

Deliver superior customer support experiences with an artificial intelligence-driven platform for creating and deploying cognitive chatbots.

Cognitive Cloud

**Intelligence as a Service**

**Serverless Cloud Backend**

**Rules as a Service**

**Content as a Service**

**Application Development**

**Progress® Data RPM®**

Deploy automated machine learning to accurately predict machine failures with technology optimized for Industrial IoT

[www.progress.com/datarpm](http://www.progress.com/datarpm)

**Progress® Kinvey**

A fully integrated, secure and HIPAA-compliant app development platform that accelerates delivery of native, web, hybrid or IoT apps on the cloud of your choice

[www.progress.com/kinvey](http://www.progress.com/kinvey)

**Progress® Corticon®**

Complement existing applications by automating sophisticated decision processes outside the application—reducing development and change cycles up to 90%

[www.progress.com/corticon](http://www.progress.com/corticon)

**Progress® Sitefinity™**

Build engaging multi-channel web and digital experiences that engage, convert and retain customers quickly and cost-effectively

[www.sitefinity.com](http://www.sitefinity.com)

**Progress® OpenEdge®**

Long a mainstay in the application development space, OpenEdge is valued by customers for its stability, security, broad connectivity, multiple deployment options and low TCO

[www.progress.com/openedge](http://www.progress.com/openedge)
Connected Data

Connect to data from any cloud or on-premise location; leverage hybrid connectivity to access data from any cloud, even behind firewalls

www.progress.com/datadirect

Progress by the Numbers

- 1981 year founded
- 90% of Fortune 500 use Progress products
- 140k enterprises in 180 countries
- 2m developer community
- 6m end users

About Progress

Progress (NASDAQ: PRGS) offers the leading platform for developing and deploying mission-critical business applications. Progress empowers enterprises and ISVs to build and deliver cognitive-first applications, that harness big data to derive business insights and competitive advantage. Progress offers leading technologies for easily building powerful user interfaces across any type of device, a reliable, scalable and secure backend platform to deploy modern applications, leading data connectivity to all sources, and award-winning predictive analytics that brings the power of machine learning to any organization. Over 1,700 independent software vendors, 100,000 enterprise customers, and 2 million developers rely on Progress to power their applications.
