## CHALLENGE

Infor strives to transform innovative ideas into product features as quickly and efficiently as possible, with enhanced and easier to maintain security for cloud-based apps, and support for a wide range of digital channels—so it can continually offer the most modern and trusted ERP solution.

## SOLUTION

**Progress Application Server for OpenEdge**

Empowered Infor to quickly cloud-enable its application with improved security and multi-tenant features while minimizing system resources for performance and scalability.

**OpenEdge Multi-Tenant Tables**

Enables secure physical separation of data to provide degrees of scalability when adding new customers to the platform.

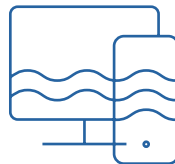

**OpenEdge Authentication Gateway**

Ensures Infor's customers have a hardened security environment for access to their apps.

## RESULTS

Modern, secure applications, leveraging a rock-solid infrastructure with OpenEdge.

Ease and efficiency of app maintenance and integration with other systems.

Rapid delivery of the latest technical capabilities to its customers.

"Our partnership with Progress allows us to have a platform that supports our innovation goals while allowing our customers to stay current in the marketplace with the latest technologies."
