Challenge

Modernize its application to meet evolving technology demands while still delivering security, productivity and a consumer-like user experience.

“It was a key part of doing true modernization, positioned us to compete in the SaaS space and prepared us to manage the future. It was a no-brainer.”

Morten Janum,
CIO and Vice President, Mark Information

Solution

OpenEdge 12.2

Progress Application Server for OpenEdge

Kendo UI

Results

Boosted productivity between 100-150%

Gained access to the latest security and integration features

Shifted over 70% of customers to cloud environments

Progress OpenEdge 12.2 made true modernization possible, delivering secure, scalable infrastructure, tailor made to tackle both mobile and the cloud.
