

Constellation Financial Software Evolves Its Business with the OpenEdge 12 Platform

AT A GLANCE

A Constellation Software Company

To stay ahead of the expectations of modern enterprise customers, Constellation Financial Software wanted to evolve its financial management solution into a web-based application. Upgrading to OpenEdge 12.1 enabled Constellation to successfully launch web-based application with greater security, performance and scalability.

Challenge

Constellation wanted to evolve its Win32-based financial management solution into a web-enabled product to meet the expectations of its customers.

“With OpenEdge 12.1, we’re particularly excited about its performance and ability to truly scale. We’re glad to have it in our production environment, especially for our larger customers.”

Ken Walsh,

Product Manager, Constellation Financial Software.

Solution

PAS for OpenEdge offers an evolved application architecture that supports modern business demands

Progress Services provides expertise for getting the most out of OpenEdge applications

Telerik and Kendo UI offer tools for building modern user interfaces

Results

New cloud-ready architecture improves application scalability

Web-based application makes it easy to access and use the Constellation application

Customers are very happy with the new web-based application

Scale Your Business to New Heights with the OpenEdge 12 Series
