

Course title

Accessing REST services from a Progress OpenEdge ABL Application

Course duration

Equivalent to 4 hours of instructor-led training

Audience

This course is for ABL application developers who need to access REST services from a Progress ABL application.

Description

This course teaches about REST (Representation State Transfer) and HTTP (Hypertext Transfer Protocol), and how to access REST services from a Progress OpenEdge ABL application.

The materials that you receive with this course include a Course Guide, which includes hands-on lab exercises and step-by-step solutions, and a CD with example code and exercise files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with OpenEdge 11.5.1.

Role-based learning path

This course is a part of the following role-based learning path:

- OpenEdge 11 Developer
-

What you will learn

After taking this course, you should be able to:

- Describe HTTP and REST.
 - Access REST services from an ABL client.
-

Prerequisites

Students should already be able to develop OpenEdge ABL applications using Progress Developer Studio for OpenEdge. Knowledge of REST and HTTP would be an advantage.
