

Course title

Progress OpenEdge Database Administration

Course duration

Equivalent to 32 hours of instructor-led training

Audience

This course is for Progress OpenEdge database administrators.

Description

This course teaches basic Progress OpenEdge database administration tasks. Initially, you get an overview of OpenEdge RDBMS architecture and of different OpenEdge database administration tools. Then, you learn to perform the following tasks:

- Create an OpenEdge database.
- Start and shut down a database.
- Manage extents of your database.
- Back up and restore a database.
- Implement roll-forward recovery using after-imaging.
- Dump and load a database.

The materials that you receive with this course include a Course Guide, which includes hands-on lab exercises and step-by-step solutions, and a CD with example code and exercise files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with Progress OpenEdge 11.5.

Role-based learning path

This course is a part of the following role-based learning path:

- OpenEdge 11 Administrator
-

What you will learn

After taking this course, you should be able to:

- Describe Progress OpenEdge RDBMS architecture.
 - Describe the functions of different database administration tools.
 - Create an OpenEdge database.
 - Start and shut down a database.
 - Manage extents of your database.
 - Back up and restore your database.
 - Implement roll-forward recovery using after-imaging.
 - Dump and load a database.
-

Prerequisites

Students should already:

- Understand relational database concepts such as tables, indexes, triggers, primary keys, foreign keys, and entity-relationship diagrams.
 - Possess a working knowledge of the UNIX or the Windows operating system.
-
