

**Course title**

*Progress OpenEdge AppServer Administration*

---

**Course duration**

Equivalent of 12 hours of instructor-led training

---

**Audience**

This course is for Progress OpenEdge AppServer Administrators.

---

**Description**

This course introduces you to the configuration and management of distributed application environments using the Progress OpenEdge AppServer. You will learn to manage an OpenEdge AppServer and to configure application-specific settings for an AppServer. You will also learn to implement load balancing and fault tolerance in an AppServer environment, as well as to implement AppServer security. Finally, you will learn how to monitor an AppServer.

The materials that you receive with this course include a Course Guide, which includes hands-on lab exercises and step-by-step solutions, and a CD with example code and exercise files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

---

**Version compatibility**

This course is compatible with OpenEdge 11.4.

---

**Role-based learning path**

This course is a part of the following role-based learning path:

- OpenEdge 11 Administrator
- 

**What you will learn**

After taking this course, you should be able to:

- Manage an OpenEdge AppServer.
  - Configure application-specific AppServer settings.
  - Implement load balancing and fault tolerance in an AppServer environment.
  - Implement AppServer security.
  - Monitor an AppServer.
- 

**Prerequisites**

Students should already be able to:

- Configure and administer applications in a client-server computing environment.
