

Schneider Electric Speeds Up Mobile Development by 50% with Kinvey

Schneider's Customer Care app was a great tool for answering basic customer questions, but growing user expectations pushed Schneider to evolve the experience even further. Progress® Kinvey™ enabled Schneider to quickly develop the next generation mySchneider app, which provided a more personalized user experience.

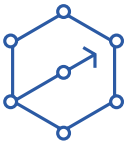

COMPANY	Schneider Electric	INDUSTRY	Energy & Utilities
PRODUCT	Kinvey	COUNTRY	France

CHALLENGE

With mobile being a key competitive differentiator, Schneider wanted to create more dynamic and intelligent app experiences.

SOLUTION

Kinvey is a high productivity app development platform that enables enterprises to accelerate app delivery

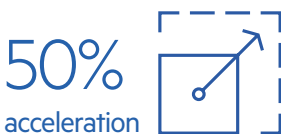

By decoupling the frontend from the backend, Kinvey enables a more agile approach to app development

With a rich set of built-in features and capabilities, Kinvey enables Schneider to easily roll out complex digital experiences

RESULTS

Schneider was able to accelerate the development of the next gen mySchneider app by 50%

Customers love the new app, with the app store rating jumping from 3 to 4.3 stars

New features and capabilities can be delivered every 2-3 weeks instead of 8-12 due to Kinvey's decoupled architecture

“Kinvey provides us a platform that not only enables our developers to rapidly push out features to provide a great user experience, but also delivers on the backend, enabling us to get the data needed.”

RAJ SADASIVAN
CHIEF DIGITAL CUSTOMER EXPERIENCE ARCHITECT, SCHNEIDER

Deliver rich, innovative mobile experiences fast with Progress Kinvey.
