

How Turtle & Hughes Improved Reporting and Minimized Database Disruption with OpenEdge Pro2

AT A GLANCE

After launching a new integrated supply service, Turtle & Hughes needed to improve database availability and reporting capabilities to better support customers. Progress® OpenEdge® Pro2™ offers near real-time data replication, alleviating stress from the production database while satisfying customers' reporting needs.

COMPANY	INDUSTRY
Turtle & Hughes	Electrical Contractors
PRODUCT	COUNTRY
OpenEdge Pro2	U.S.

Challenge

With customers of a new integrated supply service relying on critical information in Turtle & Hughes' database, the company needed to improve reporting and database availability.

“We didn’t want to use the production database for reporting and all the integrations with other applications. We needed something that would alleviate stress from the production database. Pro2 was exactly what we were looking for.”

Izabella Legocka,
Director of IT Applications, Turtle & Hughes

Solution

 OpenEdge Pro2 replicates data to a desired target database in near-real time

 OpenEdge Pro2 enables businesses to access critical data without straining their production database

 MDBA Services provides round-the-clock database monitoring from OpenEdge database specialists

Results

 Replicating data in real-time to a different database enables Turtle & Hughes to offer new reporting capabilities

 By replicating data, Turtle & Hughes is also able to alleviate strain on the database and minimize downtime

 MDBA Services also help Turtle & Hughes further avoid database downtime and provides peace of mind

Replicate Your Data in Real-Time Without Disrupting Business Operations
