

# Esri and MarkLogic: Location Analytics, Multi-Model Data

Ben Conklin, Industry Manager, Defense, Intel and National Security, Esri Anthony Roach, Product Manager, MarkLogic James Kerr, Technical Director, Partner Enablement, MarkLogic

**Location Analytics** 

Multi-Model Data Integration

Location Analytics for ALL your Data

## Esri ArcGIS Patterns of Use

## Mapping & Visualization

Understand locations and relationships with maps and visual representations

#### Data Management

Collect, organize, and maintain accurate locations and details about assets and resources

#### **Field Mobility**

Manage and enable a mobile workforce to collect and access information in the field

#### Monitoring

Track, manage, and monitor assets and resources in real-time

#### **Analytics**

Discover, quantify, and predict trends and patterns to improve outcomes

## Design & Planning

Evaluate alternative solutions and create optimal designs

## **Decision Support**

Gain situational awareness, and enable information-driven decision making

## **Constituent Engagement**

Communicate and collaborate with citizens and external communities of interest

## **Sharing & Collaboration**

Empower everyone to easily discover, use, make, and share geographic information

## Mapping & Visualization

Understand locations and relationships with maps and visual representations

#### Analytics

Discover, quantify, and predict trends and patterns to improve outcomes

#### Decision Support

Gain situational awareness, and enable information-driven decision making

## Design & Planning

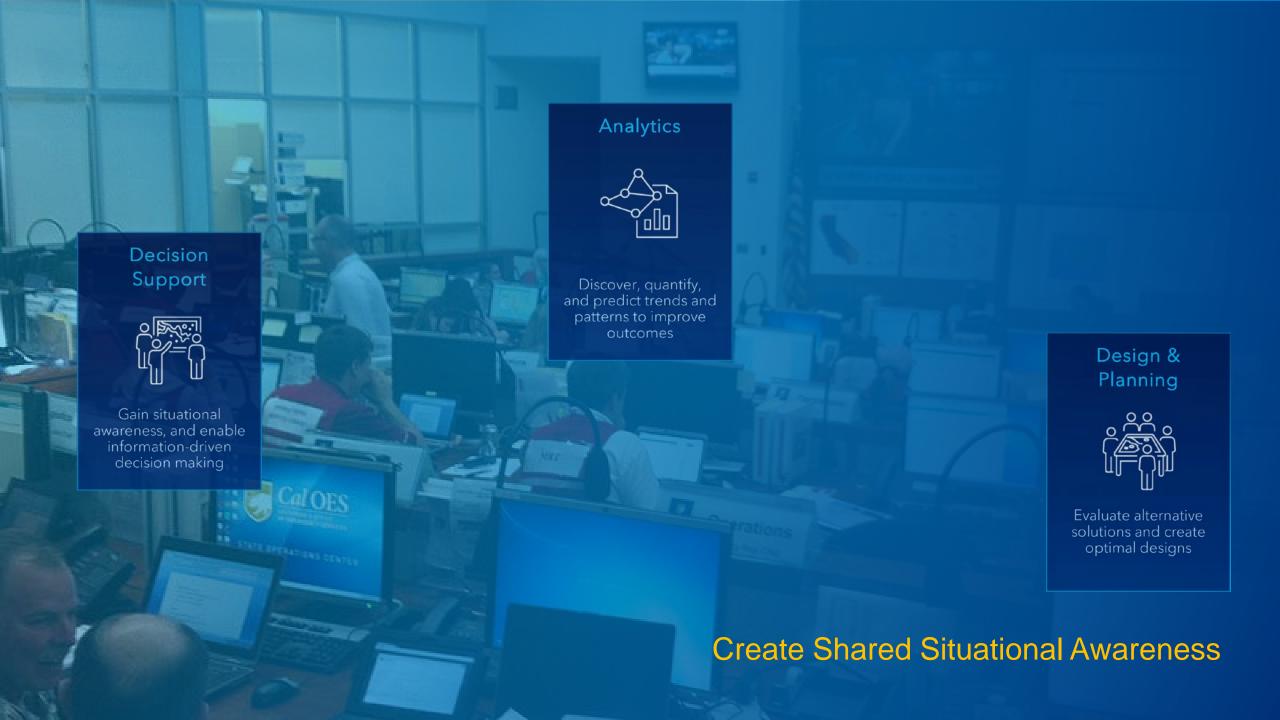

Evaluate alternative solutions and create optimal designs

**Supporting Operations** 

## Field Mobility Manage and enable a mobile workforce to collect and access information in the field Decision Support Monitoring Gain situational Track, manage, and Enabling Anytime, Anywhere Access to Maps

## MarkLogic and Esri Integration

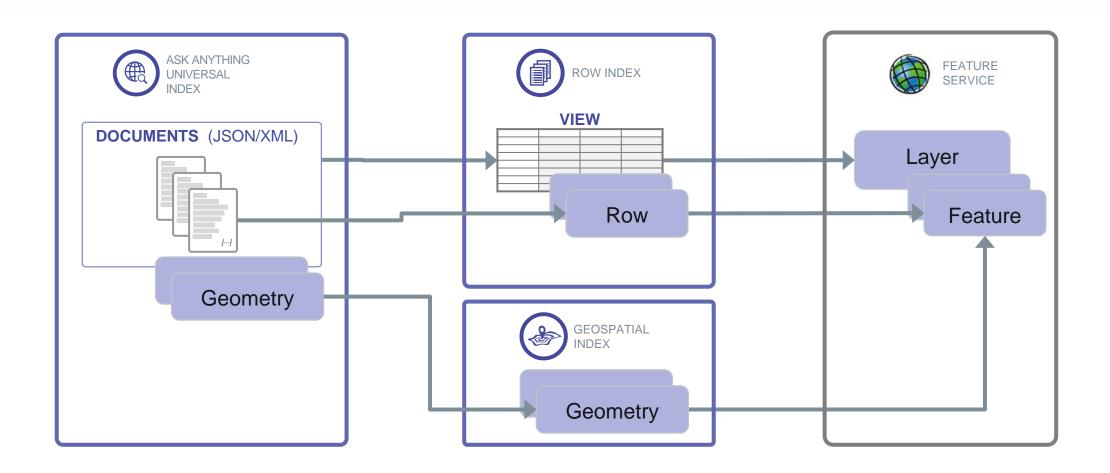

## Challenge

- Expose spatial and non-spatial data stored in MarkLogic to Esri tools
- Minimize coding required to work with new or existing databases
- Leverage MarkLogic's multi-model data management capabilities

SLIDE: 13 © 2018 MARKLOGIC CORPO

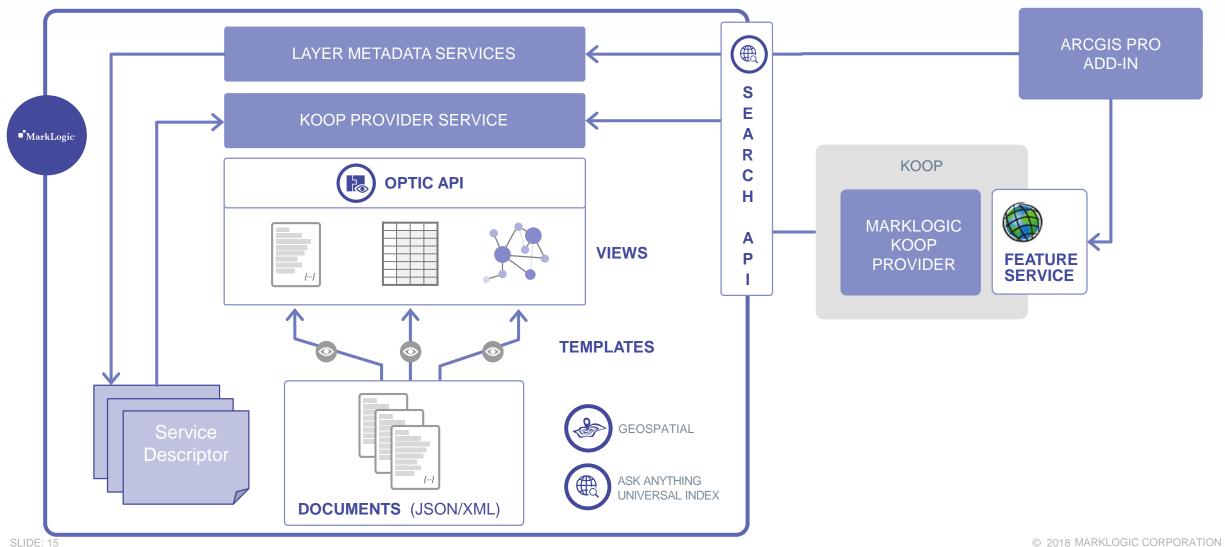

### **Data Architecture**

SLIDE: 14 © 2018 MARKLOGIC CORPORATION

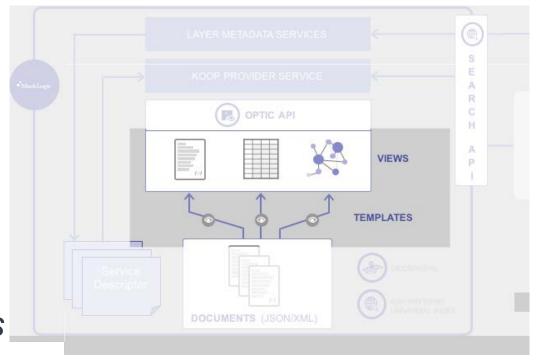

### **Esri Connector Architecture**

#### "MarkLogic

### **TDE**

- Project different views of your data
- Expose views as layers
- Views determine what fields are exposed in the layers
- Each row becomes a feature accessible via the feature service
- Easily create views to expose existing data sets as feature service layers/tables

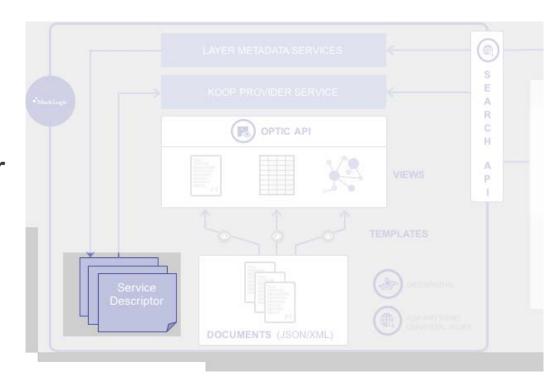

SLIDE: 16 © 2018 MARKLOGIC CORPORATION

## **Feature Service Descriptors**

- Defines the Feature Services
- Configures Layers
- Set the View for each Layer
- Set the Bounding Query for each layer
- Set what Geospatial Indexes to use
- Generate Feature Service and Layer metadata responses

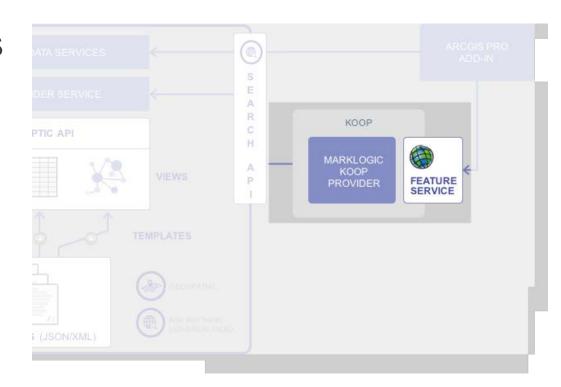

SLIDE: 17 © 2018 MARKLOGIC CORPORATION

## Koop

- Extensible JavaScript toolkit for connecting incompatible spatial APIs
- Maintained by Esri
- Node.js Express server
- Translate GeoJSON into Esri JSON
- Pluggable "Providers"
- http://koopjs.github.io/

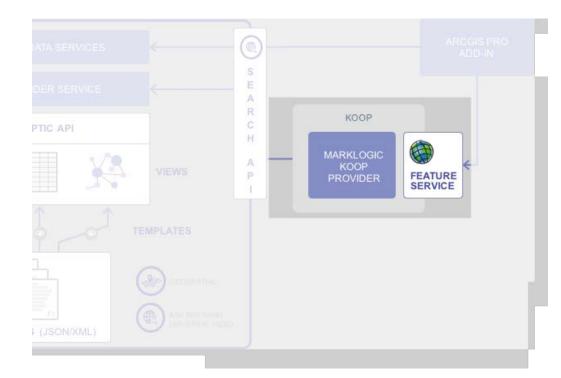

SLIDE: 18 © 2018 MARKLOGIC CORPORATION

## MarkLogic Koop Provider

- Provider plugin for Koop
- Pass-thru to a REST extension service
- Translates Feature Service requests to Optic API calls
- Configurable via Feature Service Descriptors
- https://github.com/koopjs/koopprovider-marklogic

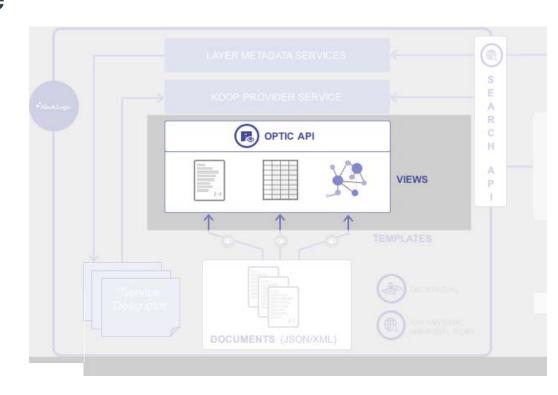

SLIDE: 19 © 2018 MARKLOGIC CORPORATION

## **Optic API**

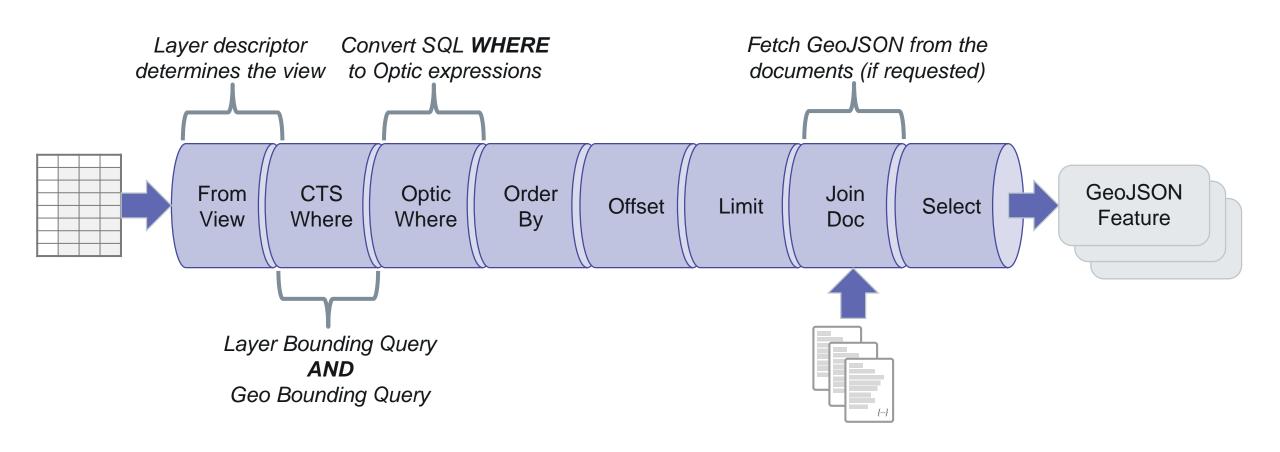

- Query layer to join entities and aggregate over documents
- Efficiently distributes work across the cluster
- Combine joins and aggregates with document queries
- Join triples
- Extract parts of documents

© 2018 MARKLOGIC CORPORATION

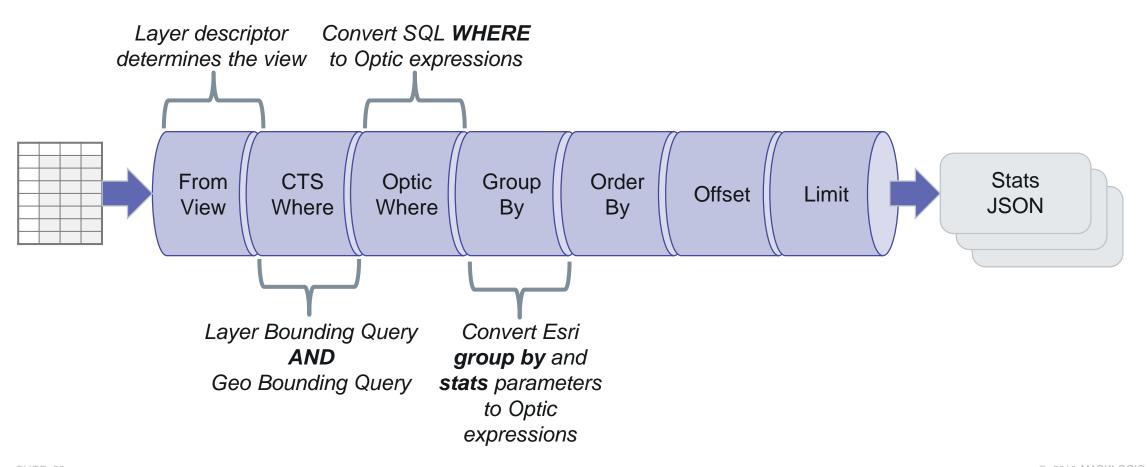

## **Optic Query Pipeline**

SLIDE: 21 © 2018 MARKLOGIC CORPORATION

## **Optic Aggregation Pipeline**

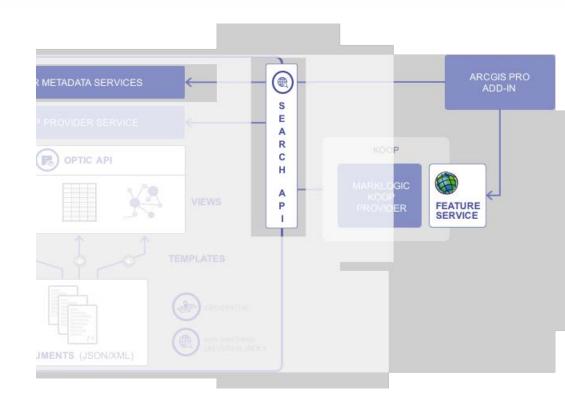

SLIDE: 22 © 2018 MARKLOGIC CORPORATION

### **ArcGIS Pro Add-In**

- Configuration driven
- Query and explore documents directly from with ArcGIS Pro
- Quickly visualize search results as "overlays"
- Save searches as new layers in the Feature Service
- Export features into standard Esri formats

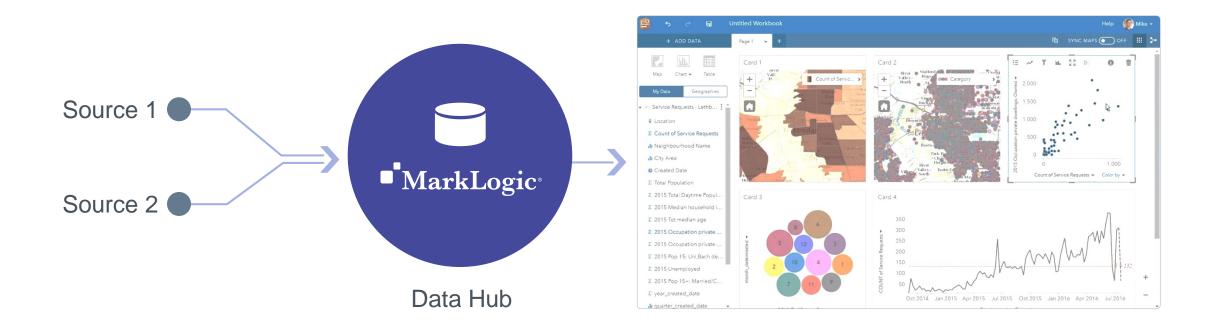

SLIDE: 23 © 2018 MARKLOGIC CORPORATION

## **Insights Demo**

Integrate data from multiple sources and visualize subsets in Insights

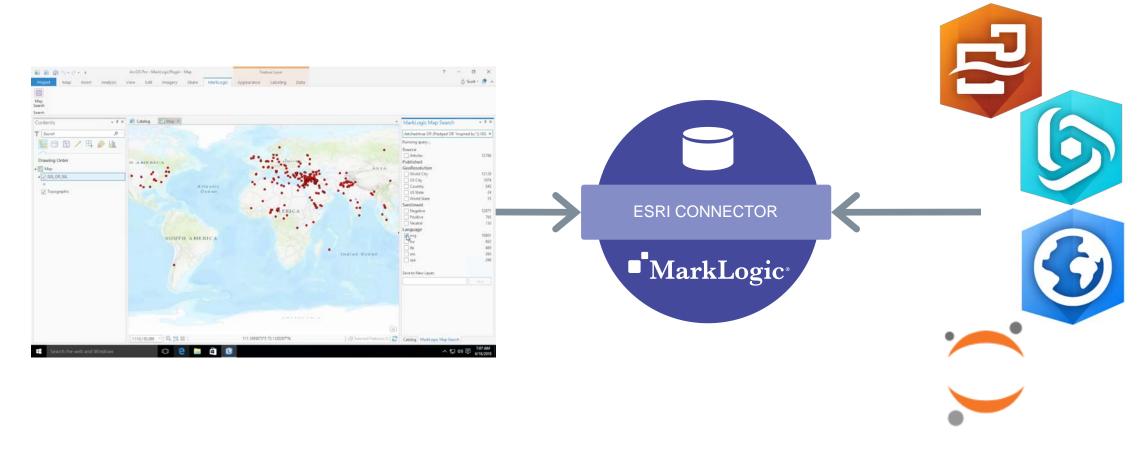

SLIDE: 24 © 2018 MARKLOGIC CORPORATION

### **ArcGIS Pro Demo**

Use ArcGIS Pro to directly explore and analyze data in MarkLogic Access stored layers from other analysis tools

SLIDE: 25 © 2018 MARKLOGIC CORPORATION

## Demo

## **Esri Connector Capability Summary**

- Expose the power of full-text indexing, geospatial indexing and row-based indexing via one interface
- Configuration-based
- Standard interface to expose data to any Esri tool
- Expose data from existing or new applications
- Leverage existing index configurations
- JSON and/or XML documents

## **Location Analytics for ALL your Data**

## Preview of New Capabilities

## MarkLogic as an Insights Data Source

- Insights will provide an extensible data source architecture
- MarkLogic data source available in July 2018
- Search and discover data in MarkLogic directly from Insights
- Analyze and visualize structured data projected from documents
- Analyze and visualize linked data
