

DB Schenker Uses Progress Professional Services to Manage Its Progress® OpenEdge® Databases

AT A GLANCE

International transportation logistics company DB Schenker faced cloud database migration troubles. In tandem with this initiative, the company was looking to do a complete system refresh. Realizing they needed additional help with migration processes, DB Schenker worked alongside Progress Professional Services to use Managed Database Administration and Progress® OpenEdge® Pro2™ tools for its new OpenEdge environment. Several methods, including system backups and report generation, became more streamlined.

Poland

Before we moved through the project, we had a big problem with our servers, where they would shut down. And as it came back up, I was already reaching out to MDBA colleagues, who had already been working on it to get it up-and-running.”

Piotr Świerczyński
Head of Global Infrastructure Systems,
DB Schenker

Challenge

DB Schenker’s enterprise class solution was on older hardware and had a complicated setup. Alongside those issues, DB Schenker could not track the health of its databases and server.

Solution

Partner with Progress Professional Services to migrate databases and servers to a more stable environment

Work alongside MDBA team to review the system and figure out where to fill-in the gaps

Set up a future capacity for the cloud in order to avoid capacity issues

Results

Successfully migrated 23 databases, 5.4 TB of data and 20 separate servers

Users can complete batch processing and create reports three to four times faster without periodic issues

Backing up the server takes one-and-a-half hours as opposed to five to six hours

Learn how Progress® OpenEdge® can migrate your databases and servers to a more stable environment
