Evolve Your OpenEdge Application to Deliver Today’s Business Needs

Modernizing your application isn’t a one-time event, it’s an ongoing process. Our Application Evolution approach helps your revitalize your OpenEdge application with new capabilities and deployment options. Ensure your OpenEdge application meets today’s requirements for extensibility, scalability, security, performance and agility to keep ahead of market demands.

Learn About Application Evolution
“Customers can reap the benefits of a bevy of tools that specialize in modern application development by opting for an incremental approach to application modernization that avoids a costly and gratuitous re-architecting of an entire application. An incremental and gradual approach to application modernization provides stakeholders with the desired modernization outcome while preserving the strongest attributes of the legacy application in question.”

Arnal Dayaratna, Senior Analyst, IDC

An Application Platform Designed to Meet High Expectations

The OpenEdge roadmap revolves around providing best-in-class capabilities for available, scalable, secure and maintainable applications for modern application development. With the forward-looking OpenEdge roadmap supporting you, you can devote more of your time to solving market demands. Should you have roadmap questions, please contact your account manager.

With the Progress Customer Validation Program (CVP), hundreds of highly-engaged OpenEdge developers even have a unique opportunity to actively influence the roadmap. Your feedback meaningfully impacts the developer experience and future enhancements of OpenEdge, so join today.

Join the OpenEdge community and learn from the successes of other businesses on the latest version of OpenEdge.
Bolster Your Application with Our Strong Tech Alliances

Take advantage of our alliances with major technology partners to level up your OpenEdge deployment. From flexible cloud deployment options to support for key third-party plugins, you can do more (and do it more easily) with OpenEdge.

Customer Success

There are so many new developments and product enhancements with OpenEdge. Our customers and partners are achieving amazing results.

“We didn't want to use the production database for reporting and all the integrations with other applications. We needed something that would alleviate stress from the production database. Pro2 was exactly what we were looking for.”

Izabella Legocka, Director of IT Applications at Turtle & Hughes
