

Progress Application Server for OpenEdge Administration (PASOE)

TRAINING

Course Duration 3 days

Audience The intended audience for this course is people who will administer PASOE servers and developers who want to gain a greater insight into the platform their applications will be deployed to.

Description This course provides details on how to administer the Progress Application Server for OpenEdge (PASOE). When completed, you will know how to create, configure and run PASOE instances in a production environment for OpenEdge 11.7 and 12.

Agenda **Progress Application Server for OpenEdge (PASOE) Administration**

- Differences between PASOE and the Classic AppServer
- Creating new PASOE instances
- Deploying WebSpeed applications on PASOE
- Configuring application-specific PASOE settings
- Deploying multiple applications to the same PASOE instance
- Configuring PASOE authentication and authorization
- Load-balancing PASOE instances
- PASOE monitoring and performance tuning
- Basic HTTPS configuration

Prerequisites General computer management skills and an awareness of OpenEdge databases.
