What you will learn

By the end of this course, you should be able to:

- Integrate WhatsUp Gold with LDAP, AD, or OpenID Connect for user management.
- Create and apply custom monitors and device roles.
- Configure email actions and advanced actions and alerts to self-heal devices and prevent outages.
- Use WhatsUp Gold Tools to have more control over your monitored network and data.
- Configure reports and dashboards.

Objectives

The course learning objectives include:

- Create custom monitors and device roles.
- Run Discovery Scans.
- Create email actions and action policies.
- Create execution actions to restart servers after outages.
- Integrate with an external user management tool such as Active Directory.
- Use the REST API to script network tasks.

Prerequisites

The learning path is designed for WhatsUp Gold Administrators who want to learn the deeper network monitoring and management capabilities of WhatsUp Gold, and pass the Certification Exam.

- Students must have WhatsUp Gold installed on their network.

Completing this learning path qualifies students to take the WhatsUp Gold Administrator Certification Exam.
