

Training:

Get Started with WhatsUp Gold Administration Course

Course Duration 1 day

Audience WhatsUp Gold Administrators

Description This course provides a foundation for network administrators and IT operations professionals to be able to configure, discover, and manage their networks. Students learn the basic functionality included with WhatsUp Gold for monitoring their network, creating actions and alerts in response to device conditions, and generating reports based on their network.

Agenda Day 1

- Course Introduction
- Lesson 1: Navigate WhatsUp Gold
- Lesson 2: Prepare for Discovery
- Lesson 3: Network Discovery
- Lesson 4: Monitor Devices
- Lesson 5: Monitors and Notifications
- Lesson 6: Actions and Policies
- Lesson 7: Alerts and Alert Center
- Lesson 8: Dashboards and Reports
- Lesson 9: User Administration

What you will learn

By the end of this course, you should be able to:

- Apply credentials and discover devices on your network.
- Add monitors for your devices.
- Create email notifications in response to network events.
- Use dashboards to visualize your network and produce reports.
- Add users to WhatsUp Gold.

Objectives

The course learning objectives include:

- Run a successful Discovery Scan.
- Monitor devices.
- Create email actions and action policies.
- Set alert center thresholds and notifications.
- Create and manage reports and users.

Prerequisites

The course is designed for new and experienced WhatsUp Gold Administrators who want to learn about the Discovery, Monitoring, and Reporting workflows.

- Students must have WhatsUp Gold installed on their network.
